

Climate's changing. Is it? By how much?

You're invited to hear WHEC News 10 weatherman Rich Caniglia offer an impartial look at our changing climate, with a specific focus on our greater Rochester region. Did you know that since 1970 the average annual temperatures in our area have gone up by 2.6 degrees? You'll learn from an expert why our winters are getting warmer and our storm-event rainfalls are getting heavier. To sign up to attend, or to receive a YouTube link to watch the presentation at a later date, use your smart-phone to scan the QR code below or register online at conesuslake.org.

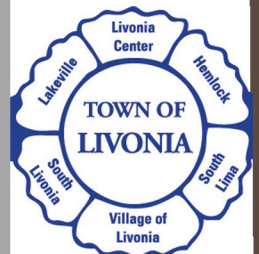

**Attend this free in-person presentation
on Thursday, Oct. 22nd at 6:30 PM**
