

# Village of Nunda Residents

If you have feral cats near your home that have not been neutered and vaccinated, please let us know. We will do our best to trap, neuter, vaccinate and release them (all done humanely, of course).

Feral cats who have already been neutered and vaccinated usually have tipped ears (we do not trap these cats)

Also, if you know of kittens of feral cats, please tell us so that we can humanely capture them and offer them for placement in good homes

Please call

"Citizens for Cats, Community and Compassion"
